

Voice Over Accessibility on iPad

VoiceOver

- Tap what you want to hear
 - Icons, words, status icons
 - Single tapping = “Speak this”
- Can read continuously
- Double tap = Open an item—don’t have to wait till speech is over—will make things stop talking
- Two-finger flick upward = read everything in sequence, top to bottom
- 3-finger flick up or down = scroll one page at a time
- 3-finger flick left/right to previous/next screen
- 3-finger triple tap = blacks out screen for privacy and battery boost
- Flick finger left or right to get arrangement of screen

VoiceOver

- Set the VoiceOver speaking rate: In Settings, choose General > Accessibility > VoiceOver, then adjust the Speaking Rate slider.
- You can choose what kind of feedback you get when you type. You can set VoiceOver to speak characters, words, both, or nothing. If you choose to hear both characters and words, VoiceOver speaks each character as you type it, then speaks the whole word when you enter a space or punctuation.
- Choose typing feedback: In Settings, choose General > Accessibility > VoiceOver > Typing Feedback, then choose Characters, Words, Characters and Words, or Nothing.
- You can also change the language spoken by VoiceOver.
- Change the language spoken by VoiceOver: In Settings, choose General > International > Language, then select a language and tap OK.
- Some languages may be influenced by the Region Local setting. In Settings, choose General > International > Region Format, then select the format.
